

## **ICU Teaching Programme**

### **Course Information**

**Introducing an opportunity to facilitate an amazing and powerful Programme with Children.**

***Do you have a calling to work with children?  
Does your heart beat faster when you know there's a better way?  
Do you choose to carve a path for future generations?  
Do you feel with all your heart that children need more?  
Do these questions ignite a passion to create a better world?***

**If you can answer yes to the above questions then you could be about to embark on a unique journey that will assist children and the evolution of humanity, earth and the universe.**

**The ICU Programme assists children to heal traumas and release limiting beliefs, increase confidence and self esteem, expand their minds, reach educational and personal potential and develop their natural gifts, self-respect, respect for others and other universal human values.**

**The Programme expands the children's outer consciousness and raises their vibration, improves memory and concentration and increases attention span, strengthens their resilience, awakens and/or improves their intuition, awakens skills they didn't know they had and activates their ability to see, read and play without their physical eyes.**

This Programme enables the children to align with their inner and outer energy. As they progress and complete the sessions their essence radiates through their families and communities and in turn has a powerful and positive effect on Planet Earth.

This work has been very successful in the UK, with outstanding results. It's now time to empower more children around the world, to reinforce the energy and raise awareness.

Should you be accepted into the project, you will take part in the Programme yourself, learning and understanding the techniques required to work with the children and receive the necessary tools to share this work with many. You will also sense, feel and see many changes as you align with your inner and outer consciousness.

## 'The Children Are Our Future'
